

HSKK – AIR COLLED ROUND STRANDED CABLES FOR WELDING MACHINES

Construction and Application:

These connectors are produced from highly flexible round stranded copper cables equipped with solderless pressed seamless Cu-ETP tubes as contact areas at the ends.

They provide multi-dimensional movement flexibility as well as high current transfer at welding machines. We deliver them also with punched rubber insulation tube if needed.

Technical Data:

Material: 0,10 mm annealed Cu ETP wires , uncoated or tinned

- punched rubber insulation tube

Contact Areas: seamless Cu ETP tubes , uncoated or tinned, solderless pressed
